

Incubator of Creative Industries

Incubator of Creative Industries

Enter Koprivnica is an business support institution that manages Business Incubator and the Creative Industries Incubator.

- **Only companies from the creative sector can rent office space**
- **Project "Construction of Incubators of Creative Industries" is worth 11,8 million €, and it is funded from the ERDF**
- **Space consist of 16 offices (independent units) and 15 flexible units in the coworking space**
- **All office spaces are currently filled, and the companies located in the Incubator are engaged in activities of marketing, programing, photography, audiovisual activites, filmmaking, design, IT security, inspection and certification.**

Coworking and meeting room

Incubated entrepreneurs and other entrepreneurs can use Coworking room which has projection screens and TVs.

This is Ideal space for conferences, workshops, promotions.

Within coworking room is a smaller meeting room.

Users of this space have a projector and a projection screen at their disposal.

The teleconference hall contains 20 seats and it has a system for conference calls via "Skype for Bussines", it is used for meetings and teleconferences. **The terrace** is very popular space for exhibitions and lectures, and is often used for informal gatherings of incubated SMEs.

Terrace

3D modeling room

3D modeling room within Incubator contains a 3D printer and a computer with the installed software needed to create a 3D model.

What distinguishes this one from some other smaller 3D printers is that it is suitable for individual prototyping, but also for smaller series production, and the prototyping time is shortened.

Equipment and capabilities

Incubated SMEs can use 'Gaming' corner with PlayStation console and VR accessory for relaxation or business. Part of equipment is also a Hologram. Holographic technology has brought a real revolution when it comes to new and innovative ways of advertising. Currently there are 2 holograms at Iki. Incubated SMEs can use it for marketing and advertisement.

Services for SMEs through BSO Enter Koprivnica

- Financed from ERDF
- The main problem the project seeks to address is the lack of information services for SMEs in the Koprivnica- Križevci county
- Aim is to facilitate access to business knowledge, skills and professional support
- Target groups are SMEs in all stages of development
- Project consists of 3 sets of activities
- Various educations, workshops for SMEs about funding opportunities, digitization, communication tools, innovation in food processing, new technologies and innovations are organized

Digital Innovation Hub North

DIH North was founded by three partners Technology park Varaždin, Technology Innovation Centre Međimurje and ENTER Koprivnica.

Goal is to support the local SMEs with their digital transformation through activities such as building ecosystem, mediation and networking, development of strategies for companies, concept validation and prototyping, pre-competitive series production.

SMEs can use infrastructure, can get digital maturity assessment, incubator / accelerator support and mentoring and mentoring.

DIH has all the necessary software licenses for 3D modeling, design and visual prototyping. Part of DIH's infrastructure are 3D printer, Hologram, VR equipment, 3D scanner for rapid prototyping, CNC machines and laser cutter for rapid prototyping and production of small series, wood and metal processing machines.
